

## Karnaugh Maps

allow relatively complicated things to be done fairly quickly.

Can insert X into k-map

X = don't care / doesn't matter

generating / minimising  
boolean functions

	ab	00	01	11	10
cd	00	0	0	X	0
	01	0	1	1	0
	11	0	X	1	0
	10	0	0	0	0

see 'what's the point?' slide

"to be continued / revisited at 4pm". but did not!
